An absolutely stunning piece of land with fantastic views. Situated in a quiet area, although still within a small walk of the local village and minutes from the town of Pinoso. The vendor has informed us that mains water is located on the boundary of the land and that electricity may be taken from the pole in the middle (but this may need upgrading). There may also be the possibility to split the land into separate allotments for the construction of 4 or 5 houses, but this must be verified by the Town Hall and Land Registry beforehand.
